LED380NWW12	2.5W				3000K		

### Installation of Inground Lighting

Please ensure any in-ground light fitting is installed with adequate drainage and excess water does not accumulate beneath the fitting. Use some form of 10cm depth aggregate (gravel) for drainage. Warranty is void if drainage is insufficient to rapidly drain pooled water away.

### Cable Connections for Inground & Exterior Lighting

IP68 connectors or similar waterproof connections must be used to ensure water does not siphon into fitting over time during operation of light via cable joins. Refer to page 188 for more information
