

# SR-2818WIN+RF

## Wi-Fi RF Converter

# GRE Lighting

R & C Agency International  
Lighting Specialists for over 15 years

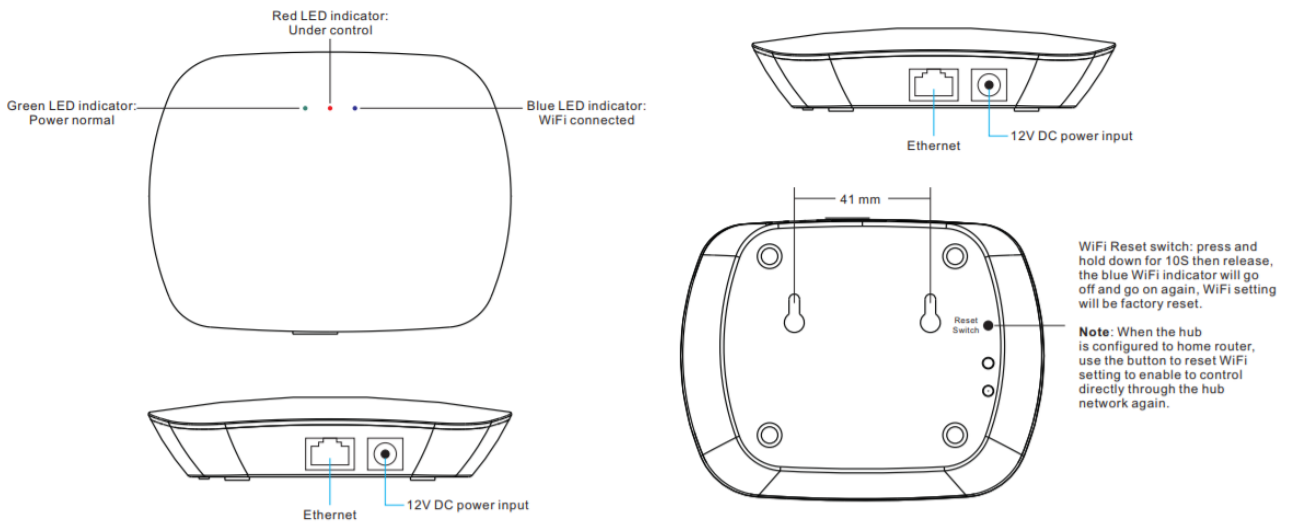

### Description:

The SR-2818WiN is a compact WiFi-RF converter designed to convert WiFi signal to RF signal and be compatible with SR-1009 series receivers, which enables the RF controllers to be WiFi controlled by APP in stalled on IOS & Android mobile devices. It receives WiFi signal from the mobile devices and converts it to RF signal and send to the receiver. This converter greatly facilitates users to simplify the control, they do not have to find the remote controls everywhere. The WiFi-RF converter can be compatible with SR-1009 series receivers to control single colour, dual colour, RGB & RGBW LED Lighting.

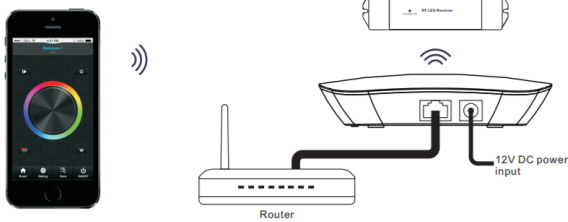

Item Code	Input Voltage	Output	Operating Temperature	Relative Humidity	Size L x W x H
SR-2818WIN+RF	12V DC	RF Signal	0-40°C	8% to 80%	85 x 110 x 24 mm

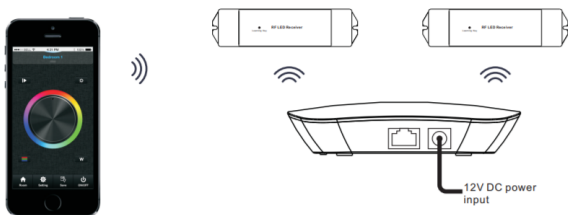

### Wiring diagram

Method 1: Connect your cell phone with your home net router(WiFi-RF)

Method 2: Connect your cell phone with the converter(WiFi-RF)

### Operation

1. This WiFi-RF converter can be controlled by both "Easylighting" and "Easyhome" apps, please choose either of them to control.
2. For "Easylighting" app, download application from 'app store' or 'google play' by searching 'easylighting' or scanning following QR codes.
3. For "Easyhome" app, download application from 'app store' or 'google play' by searching 'Easy Home - Smart Home'.
4. If the converter has connected with router, then connect your cell phone to your router network. If the converter did not connect with router, then connect your cell phone to the converter network directly. (Password: 0123456789)
5. Open the easylighting/easyhome application and operate according to the application manual.
